

BHANU PRAKASH REDDY

Software Engineer | Developer | Product Management | Tutor

EXPERIENCE

Amazon , Hyderabad —Investigation Specialist -II

October 2020 - September 2021

Investigated approximately 200 suspicious accounts daily that were flagged by the AI on enforcement and/or appeals queue, through deep-dive analysis and adjudicating the decision through analyzing the findings of various attributes.

Maintained high levels of confidentiality and data security standards.

TA Digital, Hyderabad —Software Engineer

February 2020 - October 2020

Participated in design, planning and improving UX and backend features in different domains, which involved coordination with cross-domain and cross-functional teams (Backend Engineers, Product Managers, UX Designers and Leadership).

Designed and led the efforts for A/B testing for usability for newly developed segments.

Gained pragmatic knowledge in Web Development, Quality Assurance and User Interface.

PROJECTS

Sheppie 2.0 – Ride Hailing Service-<https://sheppie.herokuapp.com/>

A live web application deployed on heroku which caters the commuting needs of students. Currently working on building version 2.0 in coordination with 2 colleagues after getting pain points.

Mechanism to save medicines from getting wasted.

Smart Inida Hackathon - Mindtree.

Developed a demo application to make medicines reusable in a hassle-free manner. Built the most favourable design with credit generation, scheduling, depreciation, collection pipeline etc.

Transportation Scheduler and Navigator.

(Sophomore Project)

Designed an application where users can find vehicles based on route/stops so that the users can get all schedules with timings at each stop.
